

Vidhi Patel

Backend Python & Django Developer

patelvidhi8420@gmail.com | +91 77790 47718 | Ahmedabad, Gujarat, India

[LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Python Backend Developer with 2.5+ years of experience developing and deploying web applications using Django, REST APIs, PostgreSQL, Docker, and cloud hosting platforms. Hands-on experience with application deployment, containerization, version control using Git/GitHub, server configuration, DNS management, and production support.

Currently advancing skills in DevOps engineering, CI/CD automation, cloud infrastructure, Linux administration, Docker-based deployments, and workflow automation. Strong interest in building automated deployment pipelines, managing cloud-native applications, and improving software delivery processes.

WORK EXPERIENCE

Ignite Digital & Events

May 2024 – 31 May 2026

Web Developer · Ahmedabad, India

- Developed and deployed multiple Django-based e-commerce platforms from development to production, including Razorpay payment gateway integration and live transaction handling.
- Implemented secure authentication & authorization systems including email OTP verification and role-based access control (RBAC).
- Designed and managed PostgreSQL database schemas with normalized tables, foreign keys, indexing, and Django ORM migrations for scalable backend systems.
- Built asynchronous email processing services using Redis and Celery to improve application performance and handle background tasks efficiently.
- Containerized Django applications using Docker to ensure consistent development and deployment environments.
- Automated build and deployment pipelines using GitHub Actions, reducing manual deployment time.
- Integrated third-party REST APIs into backend systems, including authentication handling, request/response management, and external data processing.
- Developed dynamic web applications using Django with features such as product management, cart systems, user dashboards, and admin panels.
- Deployed and maintained client websites on GoDaddy and PythonAnywhere, including DNS configuration, uptime monitoring, and production issue resolution.
- Configured Google Analytics for website traffic tracking, user behavior monitoring, and client reporting.
- Hands-on experience using AI-assisted development tools such as ChatGPT and cloud-based AI platforms for productivity and debugging support.

Maxgen Technologies Pvt. Ltd

Oct 2023 – Apr 2024

Web Developer Intern · Ahmedabad, India

- Developed RESTful APIs and backend services using Python, Django and Django REST Framework, handling dynamic content rendering and efficient data access for web applications.

- Implemented relational database models in PostgreSQL, including email-based OTP user authentication and rolebased access management across multiple user levels.
- Built and integrated lightweight API services using Flask within multi-module web applications.
- Validated end-to-end checkout flows by testing against payment sandbox environments, verifying transaction states and error-handling paths.

Probus Insurance Company
Junior Software Developer · Ahmedabad, India

Jul 2022 – Oct 2022

- Executed functional testing across iOS and Android application modules, writing detailed test cases to identify defects and validate feature behavior.
- Conducted manual regression and usability testing to verify application stability and performance prior to release cycles.

SKILLS

Backend: Python | Django | Django REST Framework | Flask | FastAPI
Frontend: HTML | CSS | JavaScript | Bootstrap | React.js
Databases: PostgreSQL | MySQL | SQLite | Django ORM | SQL
DevOps & Infra: Docker | Redis | Celery | Git / GitHub / Github Actions(CI/CD)
API & Testing: REST API Design | Postman | Unit Testing | Django Test Framework
Analytics: Google Analytics | SEO Fundamentals
Tools: ChatGPT | Claude AI | VS Code

EDUCATION

Government MCA College
Master of Computer Application (MCA)

Oct 2022 – Apr 2024
Jul 2019 – May 2022

Shri Chimanbhai Patel Institute of Computer Application
Bachelor of Computer Application (BCA)

PROJECTS

Fruit Shop — E-Commerce Platform
Stack: Python · Django · SQLite · HTML · CSS

Jan 2024 – Apr 2024

- Built a full-stack online ordering platform with product catalogue, email OTP-based registration, cart management and integrated online payment processing.
- Implemented an admin product management system for listing, updating and tracking fruit inventory and customer orders.

Restaurer — Restaurant Management System
Stack: Python · Django · MySQL · HTML · CSS

Jan 2024 – Apr 2024

- Developed a restaurant web application enabling customers to browse menus, place online orders and complete secure payments.
- Built an online table reservation system with real-time booking management, schedule control and confirmation workflows.

Distributor Management System

Aug 2023 – Nov 2023

Stack: Java · MySQL

- Built a multi-role management platform with tailored dashboards for admins, salespeople, distributors and retailers, each with scoped data access.
- Enabled real-time tracking of product movement and sales data across the distribution chain, giving each stakeholder relevant visibility.

Nursery Management System

Apr 2023 – Jun 2023

Stack: Python · Django · MySQL · HTML · CSS

- Developed a parent-facing portal for tracking children's academic progress, daily announcements and school updates.
- Implemented secure role-based login and an automated notification system delivering real-time alerts and announcements to parents.

Fire Safety IoT Monitoring System

Nov 2021 – May 2022

Stack: Python · IoT Sensors · Hardware Integration

- Designed and built an IoT environmental monitoring system tracking real-time temperature and humidity to detect abnormal safety conditions in homes and workplaces.
- Integrated hardware sensors with a Python backend for live data collection, processing and automated alerts — demonstrating full-stack hardware-to-software delivery.
